

BRAG Regional Hazard Mitigation Plan Public Draft Input Opportunity

Floods, Wildfires, Drought, Severe Weather, Landslides...What Concerns You?

About the BRAG Regional Hazard Mitigation Plan

The counties of Box Elder, Cache, and Rich, in coordination with their participating municipal jurisdictions, are finalizing a regional hazard mitigation plan (RHMP) that covers the three-county area. The BRAG RHMP identifies local policies and actions for reducing risk and future losses from natural hazards, including avalanches, dam failures, drought, floods, geological hazards, severe weather hazards, and wildfires.

We need your voice to help identify risks, prioritize concerns, and shape strategies to reduce future impacts. Please take a moment to review the BRAG RHMP draft and provide feedback by clicking the following link or scanning the QR code:
